Fast and Reliable Disaster Recovery, Data Protection and System Migration for Windows

Maximize Business Continuity and Minimize Your Recovery Time Objective with DataHawk Backup Services from BlueHawk Networks.

One of the biggest challenges companies face is how to insure business continuity and avoid business disruption following a server failure. DataHawk Backup services provide fast and reliable disaster recover, data protection and system migration to get a recovery server online as quickly as possible. DataHawk Backup Server includes bare metal recovery to the same system, dissimilar hardware or to and from virtual environments. Protect your entire server environment including the operating system, applications like MS Exchange and SQL, and your data.

DataHawk Backup Services and Your Recovery Time Objective

Your recovery time objective (RTO) is the maximum amount of time your systems can be out of commission—from when a disruption occurs to the moment your system is available again. Minimizing your RTO helps you avoid the consequences of a break in business continuity

Business Continuity Solutions

DataHawk Backup Features

BACKUP

Fast and reliable disk-based backup that captures full, differential and incremental point-in-time backup images of your entire system

RECOVERY

DataHawk allows rapid recovery in a number of ways, including full bare metal recovery through a bootable recovery CD to the same or dissimilar hardware, or to a virtual environment.

FILE and FOLDER RECOVERY

Quickly browse to specific files and folders in your point-in-time backup images to perform granular recovery of your data.

VIRTUAL BOOT

Right-click any DataHawk Backup Server point-in-time backup image and automatically boot it as a virtual machine. You can also take any backup image and convert it to a .VHD or .VMDK

Business Continuity Solutions

BLUEHAWK
N E T W O R K S™

SAVE TIME

Minimize the time required to restore your server system and data. Restore an entire server system with bare metal recovery, migrate to a new system with Hardware Independent Restore (HIR) or quickly browse to specific files and folders to perform granular recovery of your data.

SAVE MONEY

Every minute lost in recovery is income and productivity lost. Minimize recovery time windows and you maximize profits. Get business backup and running in a matter of minutes, rather than hours or days.

SAVE STORAGE SPACE

DataHawk Backup Solutions allow you to consolidate your backup images to simplify management and minimize the amour of disk space required for system backups.

It doesn't matter whether you're a small or mid-sized business, a growing enterprise, or a service provider; BlueHawk provides you with the tools you want to ensure that the business-critical information will be there when it[1]s needed the most.

The ease of use is appreciated by companies, big and small. "Lights-out", automatic backups make it possible for you to maintain the largest amount of data with an absolute minimum of resources. In addition, BlueHawk's ability to rapidly locate, identify and eliminate multiple copies of the same document helps you conserve bandwidth and storage costs.

Base Managed Backup Monthly Fee (Includes ImageManager)	$125
Base Server Monthly Fee	$75
Base Workstation Monthly Fee	$8
Microsoft Exchange Granular Restore	Optional
Secure Off Site Storage	$.75/GB

BlueHawk's automated agentless backup and recovery system effectively solves many of the current data backup and recovery challenges that businesses like yours experience every day. Whether it's a file or an entire server, the integrated products that make up the DataHawk suite are designed to provide superior data protection. From backup and recovery to encryption and archiving, BlueHawk provides superior performance at a fraction of the cost of competing products.
